Introduction

For the past ten years, Build To Transform has been at the forefront of staircase installation, continually pushing the boundaries to meet and exceed our clients' needs. We specialize in transforming outdated, mundane staircases into stunning, eye-catching centerpieces that become the highlight of your home. At Build To Transform, we understand the impact a beautifully designed staircase can have on your living space. Our passion lies in reviving and reinventing dated staircases, breathing new life into them with exceptional craftsmanship and attention to detail. If you value meticulous workmanship and a touch of finesse in every project, Build To Transform is the perfect choice for your staircase needs. Our team of specialist staircase fitters is dedicated to providing the highest level of service, ensuring that each installation is tailored to your specific requirements and preferences.

We invite you to explore our gallery of installations and renovations to see the quality and creativity we bring to each project. Contact us today for a free quote and take the first step toward the staircase you've always wanted. There is no time like the present, and you deserve to have a staircase that reflects your style and enhances your home. Proudly serving Hertfordshire, Bedfordshire, and Buckinghamshire, we look forward to hearing from you and helping you transform your staircase into a true masterpiece.

Contact us today for a free quote and take the first step toward the staircase you've always wanted. You deserve to have a staircase that reflects your style and enhances your home. Proudly serving Hertfordshire, Bedfordshire, and Buckinghamshire, we look forward to hearing from you and helping you transform your staircase into a true masterpiece.

Staircase Renovations

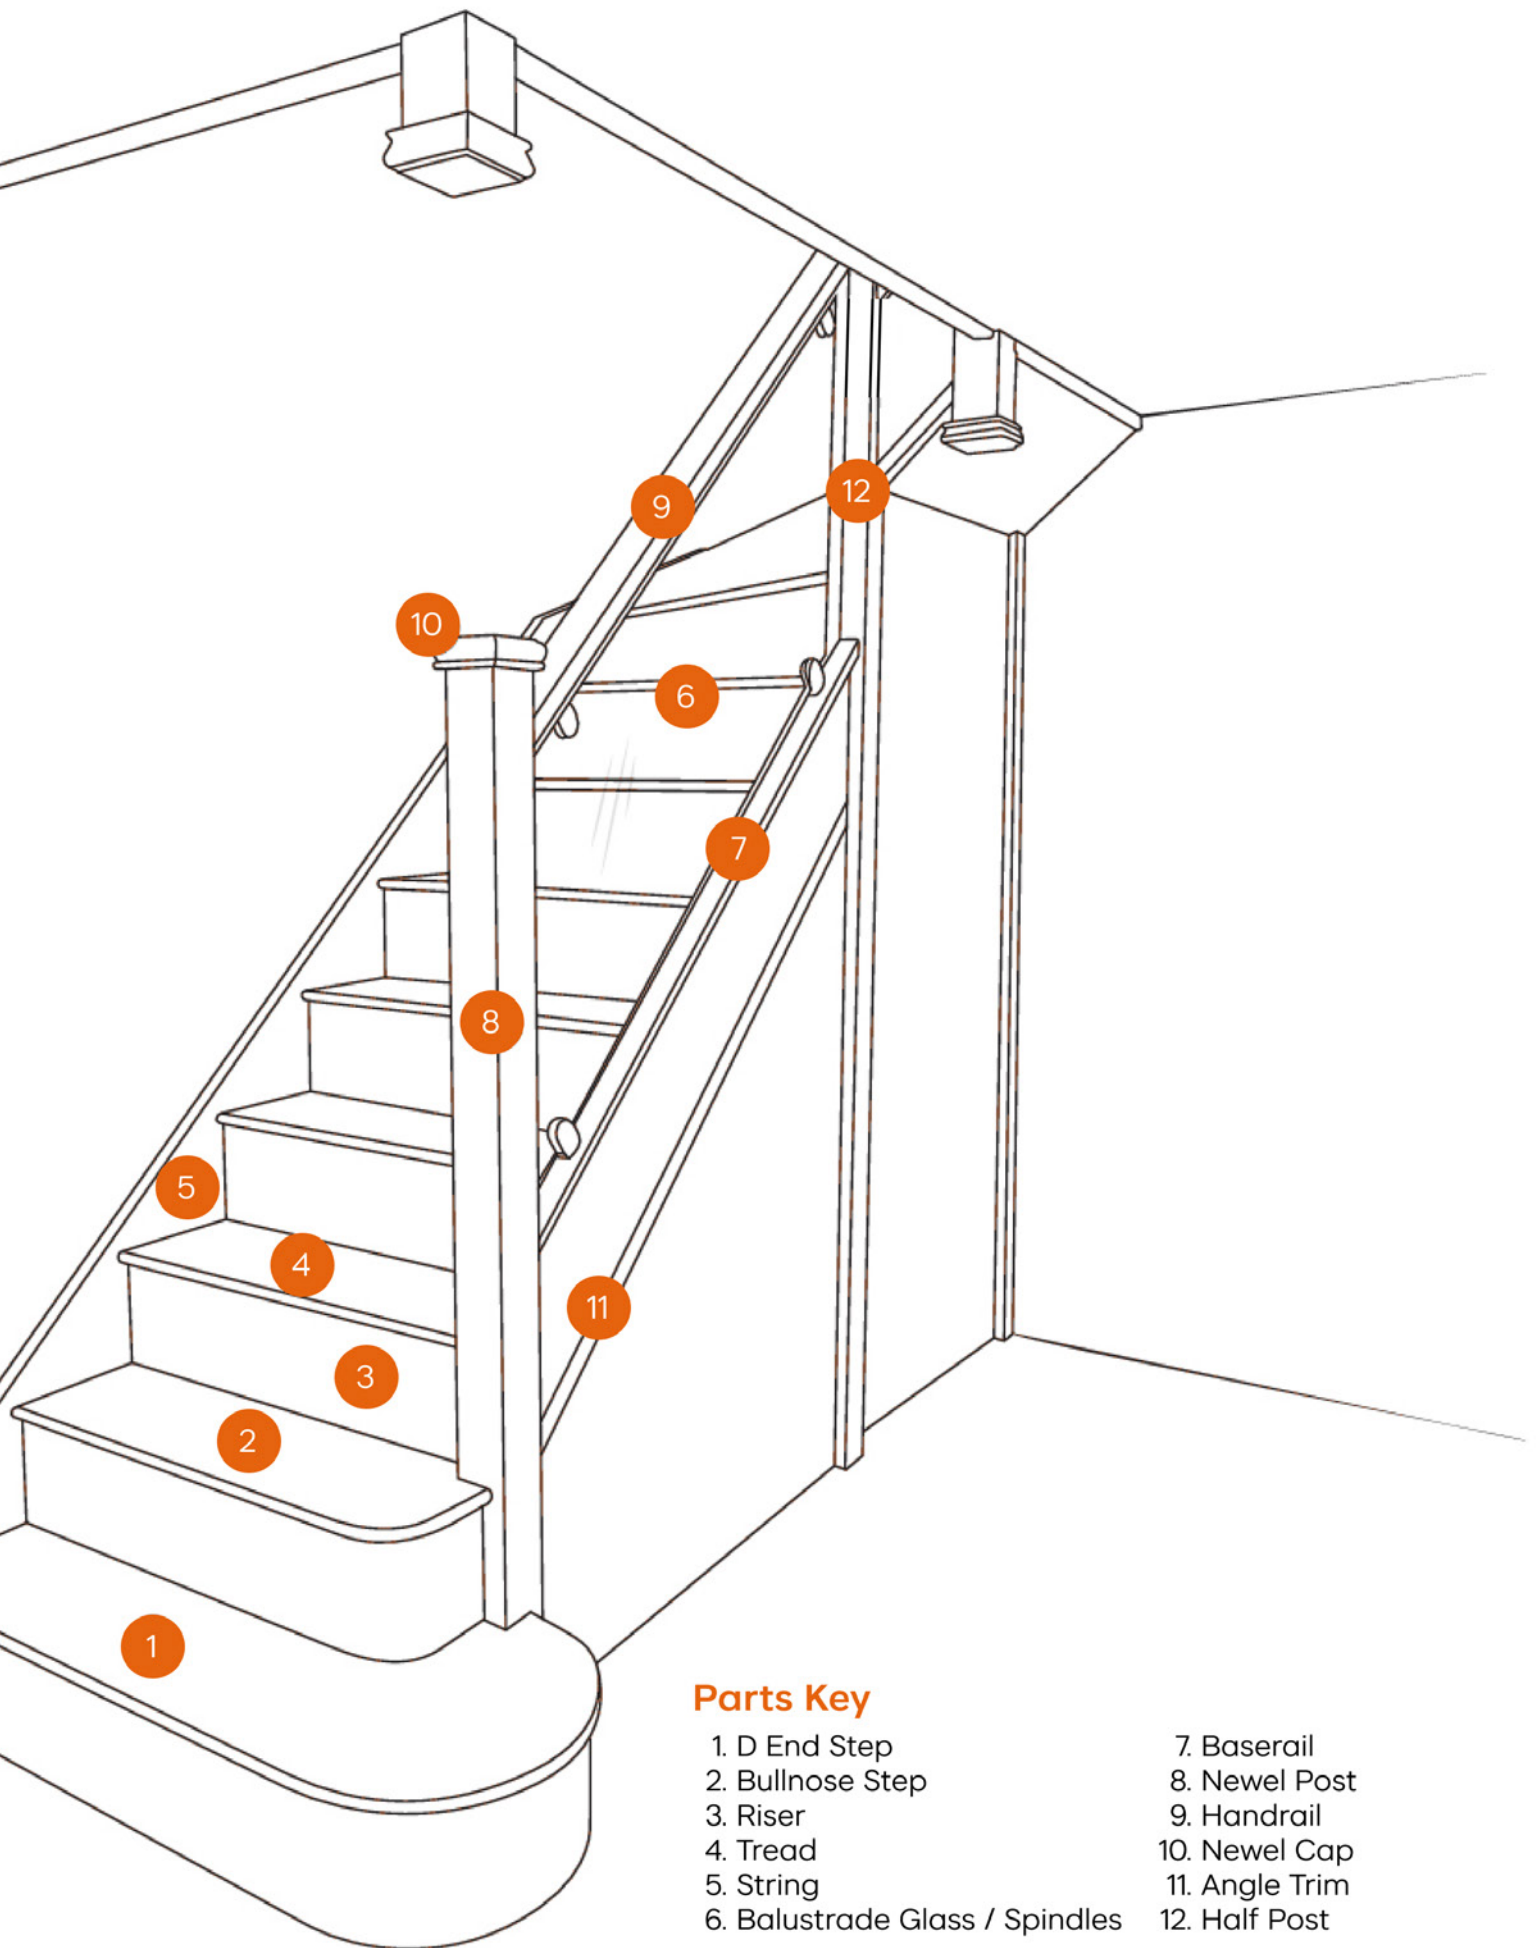

The Home of Staircase Renovations

In many homes and commercial buildings, the staircase is the focal point. We are able to restore life into your home through a beautifully renovated staircase that you can be proud of.

Our team of expert stair fitters can easily rejuvenate an outdated staircase by removing posts, changing handrails and replacing spindles with glass. We can even update a drab painted staircase with a wide range of different hardware.

In as little as two days we can change the whole look of your home with minimal work.

Once your deposit is secured, we will visit your home within two days to measure glass templates so the transition from an outdated staircase to a new eye catching centrepiece is smooth and easy.

Handrails & Baserails

Traditional Handrail

Pear Handrail

Contemporary Handrail

Mopstick Handrail

Pigs Ear Handrail

Handrails

In addition to providing safety and support, handrails add a touch of design to any staircase. Build to Transform offers a variety of handrail profiles to suit any style or design preference.

Traditional Baserail

PR Baserail

Glass Baserail

Baserails

It is essential for any staircase to have a baserail, which provides stability and support to the entire structure. Build to Transform offers a wide range of baserail profiles to meet a variety of design preferences.

and other baserails or handrails
can be supplied on request

Balustrades

Providing both safety and aesthetic appeal to a staircase, the balustrade is one of the most important components. Depending on your preferences or design style, Build to Transform offers a variety of balustrade options.

Metal Spindles

We offer metal spindle balustrades that provide a contemporary and sleek appearance. The wide range of metal spindles we offer allows you to create a custom and modern aesthetic for your staircase. Whether it is intricate patterns or simple geometric shapes, our metal spindles are crafted with precision and attention to detail. Add a touch of sophistication and elegance to your home or business with our stylish and durable metal spindles.

Wooden Spindles

Our wooden spindles combine timeless craftsmanship with modern versatility, offering a range of styles from sleek, contemporary lines to intricate, classic designs. Crafted from high-quality woods like oak, maple, and cherry, each spindle showcases the natural beauty and durability of the material. Available in various finishes, these spindles can be customized to match your décor, adding a touch of elegance and character to any staircase. With their robust construction and aesthetic appeal, our wooden spindles ensure that your staircase becomes a lasting focal point in your home.

Glass

Our glass balustrades offer a smooth, modern solution for your staircase, creating an open and airy feel while providing safety and support. Crafted from high-quality tempered glass, these balustrades are both durable and stylish, with clear or frosted options to suit your aesthetic preferences. The minimalist design allows for unobstructed views, enhancing the sense of space and light in your home. Paired with elegant stainless steel or wooden handrails, our glass balustrades are easy to maintain and resistant to wear, making them a perfect choice for a contemporary and sophisticated staircase.

Choose from the modern spindles for your balustrades, such as the sleek and shiny metal, traditional wooden ones, or glass ones. The aesthetic and attractiveness of each choice creates a remarkable focal point for your staircase.

Dovey Spindle (Round)

Montgomery Spindle

Corndon Spindle

Camlad Spindle

Cambrian Spindle

Brecon Spindle

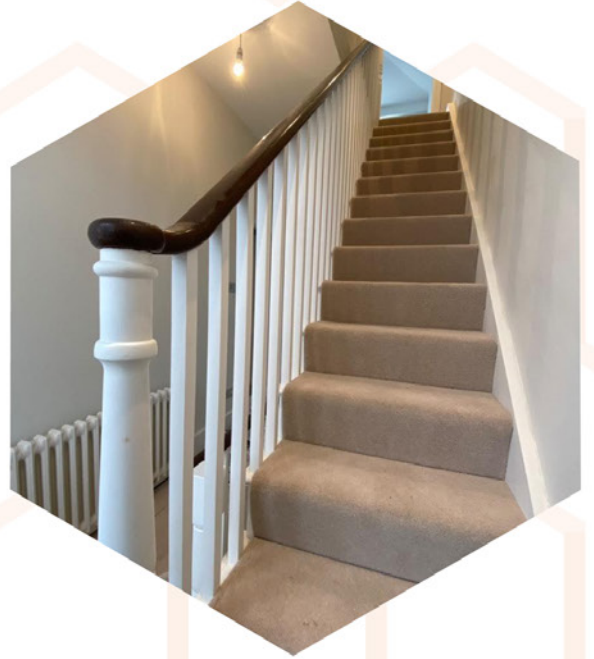

any metal balustrade can be matched

Continuous Handrail

Continuous Handrail

A continuous handrail is a critical component in staircase design, offering both safety and aesthetic appeal. Unlike segmented handrails that can have gaps or interruptions, a continuous handrail provides an unbroken line of support from the top of the stairs to the bottom. This design ensures that users, particularly the elderly or those with mobility issues, have a secure and reliable grip throughout their ascent or descent. Additionally, continuous handrails enhance the visual flow of the staircase, contributing to a sleek and modern look that complements a wide range of interior styles.

Components

Up Ramp

Wall Handrail Scroll

Swan Neck

90 Degree Horizontal Turn

Left Hand Volute

Right Hand Volute

Straight Cap

Opening Cap

Down Ramp

Horizontal Cap Turn

Floating Staircase

Create an illusion of floating steps with our floating staircase design. The treads, seemingly suspended in mid-air, are supported by hidden metal plates. This design maximizes light, making it a popular choice as it doesn't obstruct visual flow or compromise natural light.

Open Riser Staircase

The open riser staircase design offers a contemporary twist on the traditional staircase. With gaps left between each tread, this design provides a sense of transparency and lightness. The open riser design contributes to an airy ambiance, allowing light to filter through and creating a modern aesthetic that effortlessly blends with various interior styles.

Type Of Strings

Cut String

A cut string staircase is a striking design choice that adds a touch of elegance and sophistication to any interior. Unlike traditional closed string staircases, where the treads are fully enclosed by the stringer, a cut string staircase features exposed treads, with the stringer cut away to reveal the profile of each step. This design not only highlights the craftsmanship of the staircase but also creates a sense of openness, making the entire staircase feel lighter and more spacious. Ideal for contemporary or classic interiors, a cut string staircase becomes a focal point in the home, seamlessly blending functionality with high-end design aesthetics.

Closed String

A closed string staircase has side panels that cover the edges of the steps, giving the staircase a smooth and clean look. This design hides the ends of the treads and risers, creating a neat and finished appearance. It's a sturdy and stylish option that works well in both classic and modern homes.

Timber Options

At Build To Transform, we understand that the right material is essential for creating a staircase that is both beautiful and functional. That's why we offer a diverse range of timber options, each chosen for its distinctive qualities and long-lasting durability.

Oak

Oak wood is prized for its strength, durability, and natural beauty. Its distinct grain and warm tones make it a versatile choice for furniture, flooring, and staircases. Resistant to wear and easily stained, oak complements both traditional and modern interiors, ensuring long-lasting style and reliability.

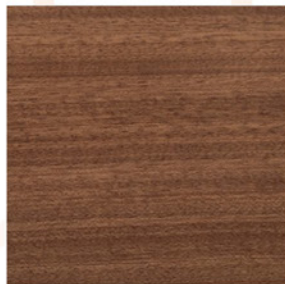

Walnut

For a darker and more dramatic feel, we offer walnut, which provides a luxurious finish and a rich texture that's perfect for a high-end aesthetic. And for those looking for a truly ecofriendly option, bamboo is a great choice, providing a sustainable material with natural beauty and strength.

Pine

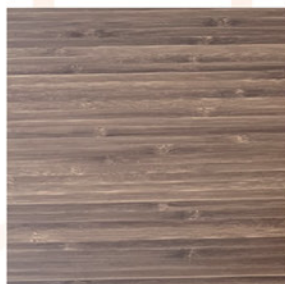

Sapele

Medium Bamboo

Light Bamboo

Dark Bamboo

The Oak Design

If a more traditional look is what you are after, our American White Oak is the option for you. This staircase design can be installed using spindles or glass which can help to modernise a more traditional look.

The White And Oak Design

The White and Oak design is the more cost effective option staircase option with the elegance of oak combining the two; the white gives off the brightness and vibrancy you want in your hall where the oak gives you the class and upper market feel you desire.

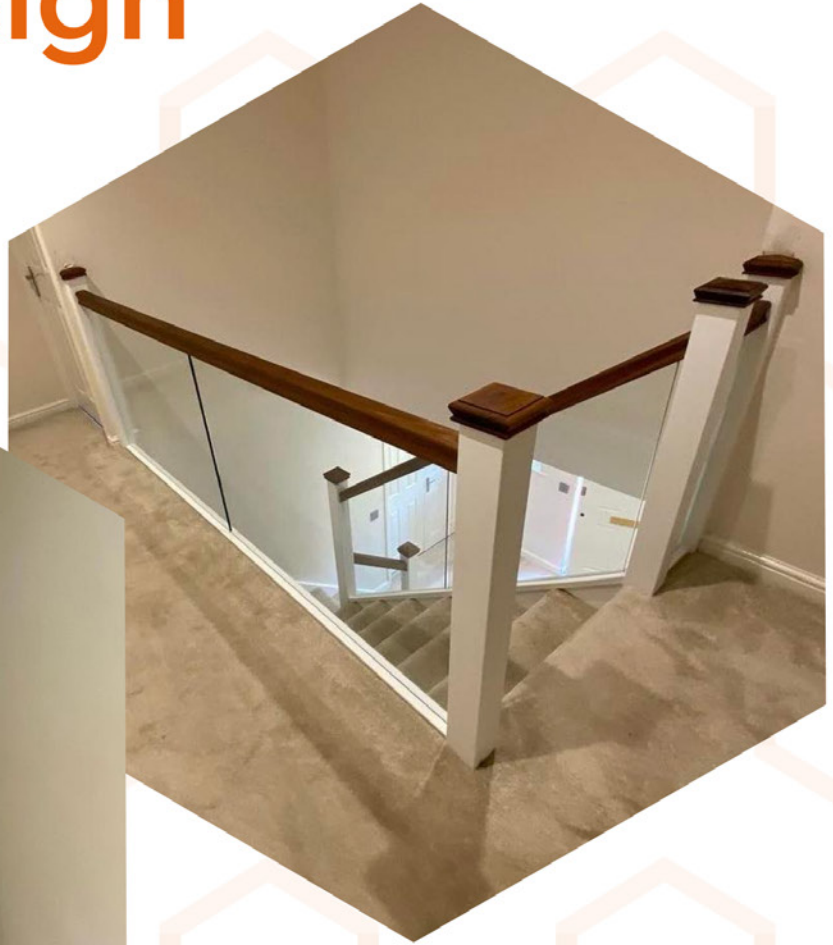

The Black Design

As black is fast becoming a popular design for staircases, the mix between the colour and glass provides a contemporary and stylish look that modernises the typical wood design. Complete with black powder coated glass clamps to provide a sleek finish, this unique design is sure to be an eye catching feature in your home. We can also offer the option glass in rail grooves.

The White And Walnut Design

Our American black walnut is of the highest quality, embodying the essence of elegance. Walnut handrails and posts, paired with white risers, white spindles, or even glass accents, will significantly enhance the beauty of your home.

As with all our designs, you have the option of 10mm toughened glass, either set within rail grooves or mounted on metal glass brackets.

Glass Balustrades

For your staircase installation, we offer a variety of glass options to suit your design needs. Low iron glass provides exceptional clarity, minimising the greenish tint seen in standard glass, making it ideal for a sleek, modern look where colour neutrality is essential. Normal glass offers a classic option with a slight greenish hue, delivering both durability and cost-effectiveness. If you're looking for added privacy or a unique aesthetic, our tinted glass is the perfect choice, available in various shades to reduce glare and enhance the ambiance of your space. Each type of glass can be customised to match your vision, ensuring that your staircase becomes a stunning centrepiece in your home.

Bamboo

Eco Friendly

Bamboo is a substitute for nature's endangered rainforest hardwoods. It's versatile, smooth, and harder than oak. It can be split into different sizes and lengths. Remember Bamboo is grass not a tree so when harvesting Bamboo you are merely cutting the grass not chopping down trees.

FSC Certified

Being FSC certified shows that you comply with the highest social and environmental standards on the market. Public concern about the state of the world's forests and timber resources is increasing, and FSC provides you with a credible solution to complex environmental and social issues.

Tougher than Wood

Bamboo fibers are far stronger than wood fibers. Bamboo is commonly used as a substitute for wood flooring so is very tough and durable.

Beautiful Finish

Consistent colouring throughout means that each component is the same colour and texture as the next. This means that when the finished product is treated with oil or lacquer or stain it will produce a consistent finish throughout.

Can be Painted or Stained

Bamboo can be painted, stained, or oiled. There is a wide selection of finishes available to finish the Bamboo including eco-friendly water-based paints and lacquers as well as natural oils that can be used to enhance the natural beauty of Bamboo.

Highly Sustainable

Depending on the species, bamboo can be harvested in one to five years. Hardwoods like oak take at least forty years to mature before they can be harvested. Almost 1 million acres of forests are lost each week worldwide to deforestation. Bamboo's versatility as a substitute for hardwoods offers a chance to drastically reduce that figure and protect the forests that we have left.

Stronger than Wood

Bamboo can replace the use of wood for nearly every application. Paper, flooring, furniture, charcoal, building materials, and much more can be made from bamboo. What's more, bamboo fibers are far stronger than wood fibers.

Resistant to Temperature Change

Much less likely to warp from changing atmospheric conditions. Due to the manufacturing process along with Bamboo's natural resistance, it is much less likely to be affected by humidity or temperature changes.

At Build To transform, we believe that a beautiful designed staircase can be the centerpiece of your home. Our expert team is dedicated to providing high-quality, customized staircase installations that enhance both the aesthetics and functionality of your space.

Why choose us?
